SUMMARY

Aspiring Software Development Engineer (SDE) with hands-on experience in full-stack web development using React.js, JavaScript (ES6+), HTML5, CSS3, and Bootstrap. Proficient in Data Structures & Algorithms with 100+ problems solved on LeetCode. Built and deployed 3+ real-world projects including an e-commerce platform and task management system. Experienced in RESTful API integration, component-based architecture, and Agile workflows. Seeking a software engineering Full-time role to contribute to scalable, high-impact products.

EDUCATION

Bachelor of Technology — Computer Science & Data Science

Mangalmay Institute of Engineering and Technology, Noida | GPA: 8.6

2023 — 2027

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming, Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)

SKILLS

- **Programming Languages:** Python, C++, JavaScript (ES6+)
- **Frontend:** React.js, HTML5, CSS3, Bootstrap 5, React Hooks, React Router DOM
- **APIs & DB:** RESTful API, Fetch API, SQL, MongoDB
- **Tools:** Git, GitHub, Postman
- **DSA:** Arrays, Linked Lists, Trees, Graphs, Dynamic Programming

PROJECTS

E-commerce Website | [Link](#)

- Developed a fully responsive e-commerce web application using HTML5, CSS3, JavaScript (ES6+), and Bootstrap 5, implementing mobile-first design with cross-browser compatibility across Chrome, Firefox, and Safari
- Built dynamic product listing, shopping cart, and checkout modules with client-side form validation and real-time DOM manipulation, improving user interaction efficiency by 40%
- Optimized frontend performance through modular JavaScript architecture and reusable UI components, reducing code redundancy by 30%

Kanban Task Management System | [Link](#)

- Designed and developed a Kanban Task Management System using React.js with component-based architecture, enabling Agile-based project workflow with full CRUD operations
- Implemented drag-and-drop functionality and dynamic task status updates using React Hooks (useState, useEffect), managing complex UI state across multiple board columns
- Optimized rendering performance using React component lifecycle methods and modern CSS3 animations, achieving smooth UI transitions and improved user experience
- Maintained complete version control using Git and GitHub with structured commit history and branching strategy

Developer Productivity MVP | [Link](#)

- Built **DevPulse**, a developer productivity dashboard in React with dual Manager/My View modes, enabling engineering leads to track team-wide metrics including lead time, cycle time, bug rate, and deployment frequency across monthly snapshots.
- Implemented per-developer drill-down views with dynamic filtering by developer and month, surfacing color-coded performance signals and AI-style interpretations to highlight blockers and quality risks
- Designed a Manager View team summary with multi-team comparison tables and automated health signals (Healthy Flow / Watch Bottlenecks / Needs Review) to support data-driven 1:1s and sprint retrospectives

WORK EXPERIENCE

My Edu Galaxy

Business Analytics Intern • Noida

04/2025 - 06/2025

- Extracted, transformed, and analyzed large datasets using SQL queries across relational databases (MySQL, SQL Server), improving data retrieval efficiency by 35%
- Designed and automated ETL data processing pipelines using Python (Pandas, NumPy), reducing manual reporting effort by 40% and minimizing human errors
- Collaborated with cross-functional teams in an Agile environment, delivering data analysis tasks within sprint deadlines and contributing to 3+ business reporting projects

ACHIEVEMENTS

- Solved 100+ DSA problems on LeetCode covering Arrays, Trees, Dynamic Programming and Graph traversal
- Freelance Technical Trainer — delivered Python & C++ sessions to 20+ students
- Pursuing Meta Front-End Developer Certificate (Coursera)— React.js, Responsive Design, Modern JavaScript
